I read your valuable manuscript. This is an excellent review of Rezum therapy as a MIST for LUTS/BPH in patients, but I have some questions and comments:

- What is the novelty of your study?
- Are there any race-related differences regarding BPH treatment? If so, explain this issue in the introduction and discussion.
- It would be better to show your results in tables.
- There are many limitations in your study: retrospective nature/lack of control group/short-term follow-up
- Manuscript needs professional English proofing by a native speaker.
