# Vitamin K Epoxide Reductase Complex Subunit 1

National Cancer Institute

## Source

National Cancer Institute. *Vitamin K Epoxide Reductase Complex Subunit 1*. NCI Thesaurus. Code C48681.

Vitamin K epoxide reductase complex subunit 1 (163 aa, ~18 kDa) is encoded by the human VKORC1 gene. The protein is an integral membrane protein that is localized to the endoplasmic reticulum and plays a role in both vitamin K metabolism and blood coagulation.
