Review of: "Adoption of Technology Acceptance and Interfaces for Academic Information System Applications"

Nilüfer Yurtay[1]

1 Sakarya University

First of all, I would like to thank the authors for their work. I think it would be useful to add the following two processes to the study:

1. More descriptive information can be given about the survey questions used to collect data in the study.

2. The conclusion section of the article needs to be edited. In terms of forward-looking projection, the difficulties that may be experienced in the implementation of the system can be examined and added.
