

Review of: "The Political Ecologies of the Tonle Sap: Global, Regional and National Framework for Conservation and Development"

Eliza Khwairakpam

Potential competing interests: No potential competing interests to declare.

The manuscript is found to be very interesting and well written. However, a few comments need to be addressed before consideration for the publication.

1. As the manuscript stated "Conceptual framework of Political Ecology" as the main theme. Kindly explain how natural resources of the lake are linked to the political economy. Please insert the required explanation in the manuscript.
2. Please elaborate how theoretical works mentioned in the 'conceptual framework' are related to the case study. Kindly add the required sentences in the manuscript.
3. As the title suggested as 'political ecologies', Kindly explain the correlation of the ecology of the lake with political imperatives and its dimensions, in relation to ecological factors. Also, please explain the interplay between politics/political vis-à-vis ecology. It is suggested to modify the manuscript with required explanation.
