Solute Carrier Family 22 Member 3

National Cancer Institute

Source

National Cancer Institute. *Solute Carrier Family 22 Member 3*. NCI Thesaurus. Code C113563.

Solute carrier family 22 member 3 (556 aa, ~61 kDa) is encoded by the human SLC22A3 gene. This protein is involved in mediating membrane potential-dependent transport of organic cations and may play a role in the disposition of cationic neurotoxins and neurotransmitters in the brain.
