Potential competing interests: No potential competing interests to declare.

1. The purpose of the study should be clearly stated in the abstract.
2. The introduction is excessively lengthy and may distract the reader.
3. It should concisely outline the study's purpose, including the specific type of poison being investigated.
4. In section 2.3, the product being reviewed should be clearly identified and explained in greater detail.
5. Additionally, more studies similar to the current research should be included in the results and discussion section.
6. The discussion should be more assertive and compelling.
