Potential competing interests: No potential competing interests to declare.

Thank you for the opportunity to review this manuscript. The discussions of the proposed framework is relevant but do not provide for comparison of insights to related studies and the use of analytical techniques are required to give promise of new insights.

1. In Abstract , discussions related to main findings are not included.
2. Case study need to be discussed in detail.
3. Limitation of the work to be included .
4. Results and discussions: A more detailed explanation would be needed to illustrate the true benefits after applying the applied method.
5. As part of this research process, it is also necessary to improve the theoretical analysis and conclusions from this research.
6. This paper can support policy makers in the assessment of the measurements and to propose various strategies accordingly.
7. Beside that, theoretical implications should be better clarified.
8. Moreover, no clear directions for future research are indicated.
9. Proofreading is also suggested in order to increase readability and clearness of the paper.

Hope the authors will find the comments above useful for further improving the paper for the Major revision, else the manuscript is rejected.
