Drug concentration

Addiction Ontology

Source

Addiction Ontology

Definition: The concentration of a drug in a portion of matter.

Comment: The term 'quality' in the definition is used in a technical way as defined in Basic Formal Ontology to refer to a manifest attribute. It does not imply any evaluation.

This definition was imported from the Addiction Ontology (see <https://addictovocab.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.

Definitions imported from the Addiction Ontology (AddictO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.

Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.

Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.

Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.
