Potential competing interests: No potential competing interests to declare.

This is an interesting study and the authors have collected a unique dataset using cutting-edge methodology. The paper is generally well structured. However, the manuscript can be accepted with the following minor revisions:

Comments

Materials and methods

Specify how is defined as healthy rabbits.

Specify name of the ethical committee and reference number of approve document.

Should specify how the animals were slaughtered.

1. Check paper formatting, it should be according to Journals guidelines.
2. Grammatically revise the paper.
3. Needs some language corrections before being published.
4. Some information is needed as well as a detailed comparison with previous studies reported in the literature.
5. Expansion of discussion part by adding more relevant references and details to fully justify their findings.
6. The manuscript syntax needs to be improved, including sentence making, proper use of propositions and punctuations etc. The author(s) are advised to revise the manuscript from English native.
7. Formatting the figures according to Journal guidelines (same Font, size, scientific names in italic etc.).
