

Review of: "Internet of Things in Smart Grid: A Comprehensive Review of Opportunities, Trends, and Challenges"

Worku Abera Asfaw

Potential competing interests: No potential competing interests to declare.

I've noticed how clearly you write reviews. You include vast information and important data. You reviewed the application areas of IoT in different sectors. You clearly mentioned the current status and future prospects in figure 1. In addition, you used clear figures to review the application areas of IoT, which enables one to understand easily. And also, you reviewed the challenges of implementing and future trends. The conclusion part is too long, so try to summarize it. I really admire this ability."
