This paper has been a pleasant experience to review. The author's attention to detail, insightful analysis, and compelling arguments contribute to the academic community.

Just my few comments are the following:

1. some references are not correct e.g in discussion part of the paper, number 29 is not a study in Ethiopia also study in India#36, #37, #42 is not about India, #39 is not about Ethiopia etc. Kindly check and cite proper reference.
2. 4th paragraph last sentence is not clear. I suggest rephrasing it to make it clear for the reader.
