# POG Neuroblastoma Stage A

National Cancer Institute

## Source

National Cancer Institute. *POG Neuroblastoma Stage A*. NCI Thesaurus. Code C85424.

The primary tumor is grossly completely resected; microscopic residual disease may be present or absent; lymph nodes adherent to the primary tumor may be positive; intracavitary lymph nodes not adherent to the primary tumor are negative; if the primary tumor is located in the abdomen or pelvis, the liver is not involved microscopically.
