

Review of: "Assessing the Impact of COVID-19 on Food Consumption Preferences"

Prateek Khanna

Potential competing interests: No potential competing interests to declare.

Thanks for the opportunity to review this interesting paper. However, the manuscript in its existing form has following shortfalls:

1. I suggest the authors to rewrite Introduction section.
2. Authors must add review of literature section. I suggest the authors to provide a literature review section focusing on existing literature reviews Author try to cite article <https://doi.org/10.1177/09722629211010990>
3. Research gap is not clear.
4. Data and Methodology: Section needs more clarity in expression and one cannot draw understanding after reading this section as a whole.
5. Theoretical/Practical implications section should be specific and clear.
