Potential competing interests: No potential competing interests to declare.

The examination of the Sustainable Development Goals (SDGs) holds significant importance in today's global context, as these goals serve as a framework for addressing pressing social, economic, and environmental challenges. I find that your text presents intriguing concepts that contribute to the ongoing discourse surrounding sustainable development. However, upon closer inspection, it appears to resemble an opinion piece more than a scholarly research paper. This observation leads me to believe that there are opportunities for refinement that could elevate the work to a more academic standard.

1. Kindly provide a more detailed explanation of the gap you identified that served as the impetus for this research.
2. The author has not presented any empirical data to suggest which of the three scenarios is likely to prevail ultimately.
3. It is advisable to incorporate additional data sources beyond solely the UN DESA 2023 report to substantiate certain observations and articulate personal viewpoints, thereby enhancing the objectivity of the contribution.
4. It is advisable to incorporate additional data sources beyond solely the UN DESA 2023 report to substantiate certain observations and articulate personal viewpoints, thereby enhancing the objectivity of the contribution.
