Transgenic and Mutant Animals Shared Resource

National Cancer Institute

Source

National Cancer Institute. *Transgenic and Mutant Animals Shared Resource*. NCI Thesaurus. Code C39543.

The Transgenic and Mutant Animals Shared Resource provides development and characterization of biomedically relevant transgenic animal models and knockout experimental animals for Cancer Center members and other investigators. Resource is responsible for maintenance of genetically altered animal lines and germplasm, animal embryo cryopreservation, assisted reproduction techniques, and access to national transgenic animal databases.
