This manuscript is on a topic of enormous, it need **Major revision** before it ready for publication. I encourage the authors to rework the manuscript. After reviewing the paper here are some suggestions:

1. **Title:** Make the title more attractive and more practical.
2. **Keywords:** Need to add more appropriate keywords,
3. **Abstract:** The abstract cannot be understanding on its owns, it does not contain all the relevant facts. Please rewritten it.
4. **Introduction:** Explain the problem statement and justify the introduction.
5. **Results:** Explain the results and justify the novelty of the work.
6. **Conclusion:** I suggest reorganizing the conclusions. This section doesn't have to be a summary of the results. The review should present its contributions to the field of study/science related to the proposed purpose.
7. **Discussion:** The discussion section is absent, please provide a discussion section that can discuss the limitations, challenges, contributions, and suggestions of the developed method.
8. **English language:** The manuscript need to improving in English language.

Thank you very much for choosing me to review one of the manuscript for you esteemed journal.
