Fusion-Negative Rhabdomyosarcoma

National Cancer Institute

Source

National Cancer Institute. *Fusion-Negative Rhabdomyosarcoma*. NCI Thesaurus. Code C123736.

A rhabdomyosarcoma characterized by the absence of chromosomal translocation t(1;13)(p36;q14) or t(2;13)(q35;q14) and therefore the absence of PAX7-FOXO1 or PAX3-FOXO1 gene fusion.
