Potential competing interests: No potential competing interests to declare.

Thank you, publisher, for inviting me to the hottest research area which meets with my specializations. Please find the comments:

1. In your abstract, you missed the statement of the problem and the methods you used. Please include it.
2. Why did you use only eye-closed methods? I need justification.
3. Please discuss the reason you selected your study area as only the US.
4. What software tools did you use?
5. According to your work, which type of ASD is more prevalent in your study area? What are the main factors?
6. As a researcher, in which age group is this disease more prevalent? What are your suggestions for the next researcher?
7. Why did you use few data? Hence, we are in the era of big data.

Thank you
