

Review of: "Sociosexuality Expanded: The Role of Light and Dark Personality Traits"

Janek Musek

Potential competing interests: No potential competing interests to declare.

I find the article (manuscript) interesting and clear, although some improvements can be made, including:

- in the Abstract section: mention of the three dimensions of behavior, attitude, and desire immediately after the text “tridimensional framework of sociosexuality”, maybe shortly in parenthesis;
- Terms ‘multi-finality’ and ‘equifinality’ are not needed in the Abstract;
- Add ‘Dark Triad’ to the list of keywords;
- A brief historical introduction to the sociosexuality construct in the introductory text explaining the relation to traditional terms like promiscuity;
- ‘Bright Triad’ (Musek & Kobal Grum, 2021) may be mentioned in association with the Big Five in the introduction section;
- Comments on the gender-biased sample of participants (especially in the limitations section);
- Consider the possibility of upgrading the correlational data with multivariate analyses (factor analysis, SEM analyses).
