Thank you very much for the manuscript. I am happy to review your paper.

These are my recommendations:

1-) The following sentence may not be necessary:

Who read the informed consent form and accepted the information statement voluntarily.

2-) You can write the abstract more concisely. You can remove some of the unnecessary sentences.

3-) You can use more updated references from the last 5 years, preferably (introduction). Also, you can refer to similar studies published in Turkey.

4-) You can avoid using the word schizophrenic, as it may hurt patients with schizophrenia.

5-) There is a typo in the table.

Divorsed should be divorced.

6-) You can also highlight the novelty of the study in the abstract section. If it is the first study made in Turkey, you can mention it in the discussion section.
