Potential competing interests: No potential competing interests to declare.

1. In the introduction section, it is better to explain the motivational background why this study matters in the context of Zimbabwe.
2. Could you state clearly the contribution of the study?
3. Could you state the representativeness of the sample of the study?
4. I am still confused about the role of the respondents. Three deans were interviewed and the results are depicted in the result section. How about other respondents? What are the results of [maybe] the interview?
5. I don't think this study is mixed method; it is qualitative study, isn't it? Could you better clarify this?
