

Review of: "Examining Water Use and Sanitation Practices in Rural Schools of Chegutu District, Mashonaland West Province, Zimbabwe"

Placidia Vavirai

Potential competing interests: No potential competing interests to declare.

Where there is WASH, I would capitalize the Water Sanitation and Hygiene

On study sample size, the references are too backdated, I would reference recent publications

I would include in the abstract the perspectives of the scholars, their role in the topic and how they see WASH improving

How are the national standard departing from the international access guidelines and what needs to be done to resolve that?
