**Potential competing interests:** No potential competing interests to declare.

The article provides a high-level introduction to the use of Large Language Models (LLMs) in Bioinformatics research. It explores the broad application areas where LLMs could be employed and highlights some of the challenges and limitations in their implementation. However, the article offers only a general overview and does not delve into the specifics of how to utilize LLMs in Bioinformatics research. Nevertheless, it serves as a valuable starting point for understanding the potential of LLMs in this field.
