

# Review of: "Generic Competences in University Students from Barranquilla, Colombia"

Jhon Jairo Mosquera Rodas<sup>1</sup>

<sup>1</sup> Universidad Cooperativa de Colombia

**Potential competing interests:** No potential competing interests to declare.

It is a good article but I suggest the following:

Specify the title so that the reader is clearer about the topic.

Inclusion of statistics with graphs.

Parameterisation of the tables into an inferential graph that tells you about the relationships of the data.

A check of spelling, especially full stops and full stops.

Separate the discussion from the conclusions and support the former with data.

Best regards
