Gallbladder Neuroendocrine Carcinoma

National Cancer Institute

Source

National Cancer Institute. *Gallbladder Neuroendocrine Carcinoma*. NCI Thesaurus. Code C96919.

An aggressive, high-grade and poorly differentiated carcinoma with neuroendocrine differentiation that arises from the gallbladder. The mitotic count is more than 20 per 10 HPF. According to the size of the malignant cells, the prominence of the nucleoli, and the amount of cytoplasm, it is classified either as small or large cell neuroendocrine carcinoma.
