# Ras-Related GTP-Binding Protein D

National Cancer Institute

## Source

National Cancer Institute. *Ras-Related GTP-Binding Protein D*. NCI Thesaurus. Code C137973.

Ras-related GTP-binding protein D (400 aa, ~46 kDa) is encoded by the human RRAGD gene. This protein plays a role in both GTP-binding and lysosomal localization of mTOR complex 1 (mTORC1).
