Review of: "A Simple Preprocessing Method Enhances Machine Learning Application to EEG Data for Differential Diagnosis of Autism"

Abhas Kanungo[1]

1 Krishna Institute Of Engineering And Technology

1. Abstract of the paper should be more crisp.

2. What are the motivations behind this research work? Author should add in the paper.

3. Author should add pros and cons of the existing and proposed work.

4. The literature review is not sufficient. Include some latest research on EEG.

5. Explain practical orientation of proposed work.

6. Simulation results need to explain more.

7. The author should give a block diagram representation of the proposed model.

8. Minor grammar and syntax issues need correction.

9. More simulation results and formal comparison of results are needed.

10. Conclusions should be extended with more future work.
