

Review of: "Reducing non-revenue water in Luxor-Egypt using GIS"

Samira Gheid

Potential competing interests: No potential competing interests to declare.

The paper Reducing non-revenue water in Egypt using GIS presents various approaches to a straightforward issue, which is the reason it's considered pertinent and eligible for publication. It reflects a strategy to reduce losses in a specific work region. The issue is outlined and outlined in the manuscript, and it's addressed from a global perspective.

- 1- Don't use abbreviations in the abstract; write the full terms.
- 2- It is suggested to mention the objectives of the study in the introduction.
- 3- *There are more discussions to be given to the GIS system in the paper. Rewriting the methodology is also needed*
- 4- It is better to use more references, especially recently published articles or books.
