

Review of: "A Study of the Urban Nightlife of Delhi and its Impact on Safety"

Parama Mitra

Potential competing interests: No potential competing interests to declare.

The paper is well written as an article discussing the Night-life in the City of Delhi, but the aim of this research is unclear.

As the research component is missing, paper discusses various issues but doesnot come to any constructive finding.

Vulnerable spots are not delineated in the maps as per the claims on safety and livability in the abstract of the paper.

The documentation part is good but fails to qualify as a scientific research.
