Dear editors

Thanks for your trust in me to review the manuscript.

I have completed the evaluation of your manuscript.

The manuscript, titled "Effect of Supplementation with Moringa Oleifera on Antioxidant and Oxidative Stress Biomarkers of Infertile Women: A Pilot Open-Label Case-Control Randomized Clinical Study," needs the following revisions:

1. Authors should write the number of women in the abstract (60) and write "A total of 100 women" in the methodology, not in the abstract.
2. All scientific names should be in italics, like *Moringa oleifera*.
3. Some references are in normal brackets () and some are in square brackets []. Correct it according to the style of the journal.
4. There are no data on side effects caused by *Moringa oleifera*.

Thank you once again. With Best Regards,

Prof. Dr. Ghada Taqa
