Dear Authors

The subject is very important but manuscript presentation needs some major revision.

Abstract: needs some improvement

Main text:

1. Please explain all abbreviations
2. The methodology part needs improvement - it is unclear and not repeatable - please provide supplementary file with all questions in survey
3. Results - needs improvement; Figure 1 and 2 are not necessary. Please add few sentences according Figure 3 and 4 with the most important results.
4. Discussion could be more synthetic - it is interesting but too long.
5. Conclusion in Abstract do not correlate with that in main body. Conclusions in main body repeat results - please improve that according to abstract conclusions.
6. References section required minor improvement.
