

Review of: "Public Health Student Internship: An Opportunity to Explore System, Self, and Society"

Paolo Lauriola

Potential competing interests: No potential competing interests to declare.

In general

It is interesting. Intriguing and helpful paper, first and foremost, because two out of the three authors are Alumni.

I would appreciate some more efforts to show how science also in terms of manner to understand the society where internships will occur. It is essential to have the instrument to investigate, interpret and provide suggestions to individuals and communities.

Please look at the Rainer and Lang I suggest below.

The article mainly focused on the Indian setting. It should be mentioned in the Title and the Abstract.

In particular

- Page 2, first para: even though I generally agree with the authors. The book by G. Rainer and T. Lang (2012) could be a turning point in describing Public Health's history and future: [the Ecological Public Heath](#). Please re-arrange properly.
