Potential competing interests: No potential competing interests to declare.

In the first two parts, the authors presented the Introduction, Preliminaries, and related results from the literature. In the third part, they proved the main results. Finally, in section 4, the authors present as an application of their results, they establish that Theorem 3.3 and Theorem 3.4 can be utilized to derive the existence of fixed point results for some mappings in a cone metric space with different conditions. In the sequel, we begin with the following definitions...

Recommendation: I recommend accepting and publishing the paper.
