

Review of: "Bibliometric analysis and current status of Leishmaniasis research indexed in Scopus, 2010 -2023"

Suresh Ramanan S

Potential competing interests: No potential competing interests to declare.

The writing is good and readable. It can be strengthened with an appropriate discussion part.

The authors need to focus on strengthening the salient findings of the study rather than simply stating, "It underscores the need for enhanced collaborations and research infrastructure in low- and middle-income countries, where the leishmaniasis burden is significant." This recommendation aims to empower these countries to make substantial contributions to leishmaniasis research.
