Dear authors,

I read with great interest the manuscript, which falls within the aim of this Journal. In my honest opinion, the topic is interesting enough to attract the readers' attention. Nevertheless, authors should clarify some points and improve the discussion, as suggested below. Authors should consider the following recommendations:

In my opinion you have to improve the paper referring in the text how its really helpfull in this denantality ERA the artificial intelligence contribution as well how is suggested to these pts to perform a NIPT TEST at beginning of pregnancy as well to follow up the impart of ART in the newborn.

I SUGGEST YOU TO READ AND CITE THESE ARTICLES:
