Potential competing interests: No potential competing interests to declare.

The topic of your study is valuable, but it has some drawbacks:

1. The 9th study (Sheth Ju and et al.), which was included in this systematic review, evaluated retinal vein occlusion, not retinal vasculitis.
2. The past histories of patients were not mentioned.
3. Some of the patients did not have a systemic workup.
4. What do RE and LE in the table stand for?
