Potential competing interests: No potential competing interests to declare.

- Generally, for sampling in research analysis where adequate use of control experiments, accuracy of process data, and regularity of sampling have been made in time-dependent studies.

Detailed methodology is used and data analysis is conducted systematically (in qualitative research), this qualitative research extends beyond the author's opinions, with sufficient descriptive elements and appropriate quotes from interviews and focus groups.

- The sufficient data and clear data tables.

The data consistent, also agree with the conclusions.

Confirmatory data that adds more, if anything, to current standing - unless strong arguments for such repetition are made.

- The premise interesting and important.
- The methods used appropriate.
- The data support the conclusions.
- The materials and methods used in this research follow best practices and repeatable research to obtain further results.
- This makes effective use of the following: Control experiments - Analysis of experiments - Sampling documents more positive for this research.
- Replicable Research
- This makes sufficient use of:
 - Control experiments
 - Repeated analyses
 - Repeated experiments
