Review of: "Polymerized Type I Collagen (Fibroquel) as a treatment for COVID-19, Mexican experience"

Anju Kaushal¹

1. Independent researcher

Great communication providing an overview of the benefits of using polymerized Type 1 collagen as a treatment for COVID-19.

"Negative Modulation of IL-1, IL-8, TNF-alpha and the other leukocyte adhesion molecules." Does this imply negative regulation in the innate immune response?
