Manuscript Title: Anti-metastasis After Bee Venom and Melittin by Upregulation of BRMS1 and DRG1 Genes, With Downregulation of WNT7B in Breast Cancer Cells

Comments for the author(s):

The present study is useful and scientific, but it needs to be reformed, and I hope that something has been done to change the content of this work.

Title:

To be reviewed

Running Title:

Did not have

Abstract:

- 1. To be reviewed
- 2. Write Results and Discussion.
- 3. Write about "Wound Healing".
- 4. The purpose of this study must be at the end of the introduction.
- 5. To be reviewed Keywords

Introduction:

- 1. It needs to be reformed.
- 2. Write sentences in paragraphs.
- 3. It's written very briefly.
- 4. The purpose of this study must be at the end of the introduction

Methods:

- 1. Write the type of study.
- 2. Write ethical issues.
- 3. Write material and temperature cycle of RT-PCR.

Results:

- 1. Edit the number of figures.
- 2. Write the results of MTT in the table.
- 3. Descriptions should be written below the figures and tables.
- 4. The color of the columns in fig. 3 and 5 should be recognizable.

Discussion:

- 1. It needs to be reformed.
- 2. Compare the results of the present study with similar studies.

Conclusion:

1. Did not have
