Review on "A Novel Variable Neighborhood Search Approach for Cell Clustering for Spatial Transcriptomics"

1. Title can be written as: A Novel Variable Neighborhood Search Approach in Spatial Transcriptomics Using Clustering
2. Tables and Figures data is copy-pasted from somewhere; it's not written. Change it. Put the live dataset results in the table and also use those figures.
3. Put abbreviations line by line, not comma separated.
4. References are in ascending order, in the same format, and use Mendeley software.
