I have read your work titled "The Imperative of a Comprehensive One Health Approach for Mosquito-Borne Disease Control in Indonesia," and it is commendable. The author needs to proofread the work again to correct some grammatical errors and mistakes. The author needs to add more papers by looking into other aspects of malaria. Therefore, I suggest the following papers be studied and included in both the introduction and references:

Global Stability of SEIR–SEI Model of Malaria Transmission, Adv. Math. Sci. Journal, 9(8) (2020), 5305–5317.

Optimal Control on a Mathematical Model of Malaria, U.P.B. Sci. Bull., Series A, 82(3) (2020), 177–190.

Application of Adomian Decomposition Method on a Mathematical Model of Malaria, Adv. Math. Sci. Journal, 9(1) (2020), 417435. doi:10.37418/amsj.9.1.33

Differential Transform Method for Solving Mathematical Model of SEIR and SEI Spread of Malaria, International Journal of Sciences: Basic and Applied Research, 40(1) (2018), 197219.

A fractional-order mathematical model for malaria and COVID-19 co-infection dynamics, Healthcare Analytics, 4(2023), 100210. doi: 10.1016/j.health.2023.100210
