Hello dear editor,

I am very happy to have been given the opportunity to review this article. This article aims to determine the characteristics of God and Christ in the descriptions of near-death experiences. I liked the title of this work and it added new points to my knowledge in this field. In my opinion, the article needs minor corrections. I have mentioned a few things below to improve the article below:

- 1- Replace the word "Koran" with the word "Quran" at the beginning of the introduction. It is spelled wrong.
- 2- At the end of the introduction, mention the main purpose of this study.
- 3- There are many studies in the field of near-death experiences. Can you point out the difference between this work and others? Explain the innovation of this research better.
- 4- How were the results combined? You have extracted data from sources, but the method does not mention how to analyze and combine this qualitative data.
- 5- Has a tool been used to measure the quality of studies? Or did you include all studies that met the inclusion criteria?
- 6- We can ask you to present the discussion by separating the three important findings of this study (love, light, unity/oneness)
- 7- The conclusion should be consistent with the main findings of your study and include suggestions for future research.

best regards
