Review of: "Digital Literacy Skills of Teachers: A Study on ICT Use and Purposes"

Dicki Hartanto[1]

1 Universitas Islam Negeri Sultan Syarif Kasim Riau

The article has interesting topic and good analysis in digital technologies.

The extensive exploitation of survey data can be explored deeply as below suggestion :

1. The need of applied models for comprehensive policy frameworks and educational strategies done
2. Add the suitable professional development programmes and support are needed to improve teachers' digital literacy skills
3. It is advisable for recommendations for further research.
