Potential competing interests: No potential competing interests to declare.

1. I recommend the 'Vietnam' as a case study to be spelled out in the title
2. Abstract - insufficient description of analytical data & conclusion is unclear in abstract
3. The authors should also discuss the study area in greater detail, particularly in relation to the socioeconomic status of the population.
4. In the methods section, the authors should include inclusion and exclusion criteria during the data collection.
5. The author should discuss the limitation of this study
