The manuscript entitled: "Acoustic **over-exposure in the Institutional Land Use of Calabar Metropolitan Area, cross River State, Nigeria**" is interesting and is in the scope of the journal. This article is well written, addresses an important topic, and provides data on noise level across two majors tertiary institutions. As in many African countries, the problem of noise in large cities is a current challenge and can be a source of health problems. The objectives are well presented and the methodology used makes it possible to provide rigorous scientific results. In their results, the authors were able to determine the causes of the noise in these institutions. The conclusion clearly summarizes the results obtained and recommendations were proposed.
