# In 111 Folic Acid

National Cancer Institute

## Source

National Cancer Institute. *In 111 Folic Acid*. NCI Thesaurus. Code C2506.

A radioimmunoconjugate of folic acid labeled with indium 111 (In-111) with immunotherapeutic property. In 111 Folic Acid emits gamma radiation and X-Ray photons that can be captured by gamma camera allowing imaging of tumor cells that express folate receptors.
