Potential competing interests: No potential competing interests to declare.

A good study in terms of its objective, but it represents a qualitative study in its analysis because it is based on an analysis of the content of the cases mentioned, and therefore it cannot be considered a systematic study except by using a research design that governs all variables.

Therefore, I suggest adding the words "Content Analysis Study" to the title so that whoever reads it will know that it is merely a self-analysis of case narratives.
