Thank you for writing such a great article. It is a scientific and accurate article. It would be great if you could review and correct a few points that I mentioned below.

- 1: please indicate the number of fold that has been used in cross-validation.
- 2: In Figure 4, for each graph indicate what parameter they were prepared for.
- 3: In Figure 5, please write the guide for the map clearer.
- 4: In Table 3, please add the R2 values to make it easier to compare the accuracy of the prepared models.
- 5: Please explain more clearly about the fertility classes you have chosen, and if you have used any specific reference, please add it.
