

Review of: "SUDA energy autárkeia system"

Shahab Eslami

Potential competing interests: No potential competing interests to declare.

Although the subject is interesting, the article lacks a well-structured format.

Introduction and conclusion sections are notably absent, weakening the overall coherence.

The core of the article remains inadequately exposed, hindering a thorough understanding of the research.

The scientific contribution presented falls short of significantly enhancing existing knowledge in the field.

A comprehensive review of the article's structure is necessary, focusing on establishing a clear conceptual path and organization.

The discussion of results requires further elaboration to provide a deeper insight into the findings.

Additionally, the article would benefit from a clearer explanation of its innovative content, emphasizing advancements over current technologies.
