Potential competing interests: No potential competing interests to declare.

1. The term ECO-CSB or ECO-CSSB additives should be explained in the abstract.
2. Citations need to be added in all sections, especially from the latest research.
3. All the conducted laboratory testing shall be listed in a table, including the methods used.
4. Every subtopic lacks thorough explanation and discussion.
5. The obtained results shall be illustrated in graphical method so that readers can see the differences in additive usage clearly.
6. Overall, this paper is weak and needs huge improvements.
